

IT Emergency Equipment Fair

How do you support your staff in the deep field?

What kind of IT equipment do you provide them with?

The IT community in South Sudan plays a vital role in supporting humanitarians responding in remote and conflict-affected areas. The IT equipment provided to your staff represents a lifeline in the deep field. The latest technologies allow them to stay connected, safe and efficiently respond to the humanitarian crisis in South Sudan.

Join the IT Emergency Equipment Fair on Thursday 23 July 2015, 10:00 at the Medair office and bring your equipment with you! This is a great opportunity to showcase the latest technologies from your organization as well as learn from your colleagues.

UNHCR and WFP will also present their Digital Radio systems!
